

SylBay LED

Incredibly efficient

SylBay LED is Sylvania's most efficient highbay range yet, perfectly balancing form and functionality for specification projects. Thanks to its robust and durable design, the range is suitable for assembly and production sites, warehouses, and large hypermarket retail stores.

SylBay LED not only delivers high performance with up to 37,700lm (luminaire lumen output on 290W twin wide 4,000K version), but also high efficiency with up to 140lm/w (efficacy on 95W single wide 4,000K version).

SylBay LED benefits from precision optics to assist with EN 12464-1 glare requirements, meaning it is optimised for high-racking and manufacturing environments with very high uniformity and maximum spacing between luminaires.

Additionally, **SylBay LED** offers a very long lifetime of 100,000 hours and could help you save up to a further 30% energy with smart controls using our optional on-board intelligence sensor.

SylBay LED Incredibly lightweight

FEATURES

- Our most efficient highbay offering, perfectly balancing form and functionality
- Up to 140lm/W luminaire system efficacy
- Slim and curved architectural design; looks less intrusive when installed
 - Finned design ensures that any dust or particle build-up is deflected through the product and minimises accumulation
 - Innovative heatsink design optimizes thermal management using cooling fins
 - Incredibly lightweight for a highbay luminaire at just 4.6kg for the single body version (<18,817 lumens) - as a comparison, luminaires of this type can weigh up to 24kg
- Precision optics assisting with UGR22 schemes in accordance to EN 12464-1, optimised for high-racking and manufacturing environments with very high uniformity and maximum spacing between luminaires
 - Optics are moulded in a clear shatter resistant polycarbonate (PC)
- CRI>80 and industry leading colour consistency with 3 SDCM colour tolerance - creates a fresh, natural workplace ambience with very good colour visibility
- Suitable for assembly and production sites, warehouses and large hypermarket retail stores
- Incredibly robust and durable; high resistance to moisture, oxidation and UV radiation
 - IP65 sealed; dust tight and protected from low pressure water jets
 - IK08 impact resistance
- Long lifetime of 100,000 hours (L90 B10)
 - The power supply has its own separate housing, isolated from the heat of the LED's with its own cooling design and short circuit protection, helping to extend the product lifetime
- Ambient operating temperature:
 - 40°C to +55°C (13/26KLM versions)
 - 40°C to +50°C (31KLM versions)
 - 40°C to +45°C (18.5/37KLM versions)
- Save up to a further 30% energy with smart controls using our optional on-board intelligence sensor
 - IP65 integrated digital PIR occupancy & daylight sensing
 - Fully programmable via handheld wireless configuration tool
 - Suitable for mounting heights from 2.40m to 12m

Incredibly lightweight, which means....

Lower freight costs

Easier storage and handling

One person installation

Enhanced optics for UGR 22

CRI 80 with 3 SDCM

Beam angles optimised for specification projects

Aisle beam 60° x 20°

80° x 80°
